

Privacy Policy

Effective Date: 20/06/2026

Company: MoviCloud Labs

1. Introduction

MoviCloud Labs ("we", "our", or "us") is committed to protecting the privacy and security of patient, healthcare provider, and user information. This Privacy Policy describes how our Hospital Management System ("HMS") collects, uses, stores, processes, and protects personal and health-related information.

By accessing or using the HMS platform, users acknowledge and agree to the practices described in this Privacy Policy.

2. Information We Collect

2.1 Patient Information

We may collect and process the following categories of patient information:

Demographic Information

- First Name
- Last Name
- Date of Birth
- Age
- Gender
- Blood Group
- Phone Number
- Email Address
- Profile Photograph

Address Information

- House/Flat Number
- Street Name
- City
- District
- State
- Postal Code
- Country
- Geographic Coordinates (Latitude and Longitude)

Clinical Information

- Height

- Weight
- Body Mass Index (BMI)
- Blood Pressure
- Temperature
- Pulse Rate
- Oxygen Saturation (SpO₂)

Medical History

- Allergies
 - Existing Medical Conditions
 - Past Medical Conditions
 - Prescriptions
 - Treatment History
 - Clinical Notes
-

2.2 Uploaded Medical Documents

Users may upload:

- PDF Documents
- Microsoft Word Documents (.doc, .docx)
- Images (.jpg, .jpeg, .png, .webp)

Examples include:

- Laboratory Reports
- Prescriptions
- Medical History Documents
- Discharge Summaries
- Radiology Reports
- General Medical Documents

Uploaded documents may contain medical information and extracted clinical values.

2.3 Communication Information

The system may store:

- WhatsApp communication metadata
 - Telegram user identifiers
 - Chatbot interaction history
 - Conversation logs
 - Support communication records
-

3. How We Use Information

Collected information may be used to:

- Create and maintain patient records
 - Schedule appointments
 - Manage treatments and prescriptions
 - Process billing and payments
 - Generate clinical reports
 - Provide patient portal access
 - Facilitate healthcare operations
 - Improve system performance
 - Detect fraud and unauthorized access
 - Comply with legal and regulatory obligations
-

4. Artificial Intelligence Processing

The HMS platform uses Artificial Intelligence technologies to assist healthcare operations.

Azure OpenAI

Azure OpenAI GPT-4o may be used to:

- Process OCR-extracted medical information
- Structure clinical records
- Support healthcare document analysis
- Assist medical record retrieval

Google Gemini

Google Gemini may be used to:

- Generate operational insights
- Predict hospital occupancy trends
- Identify inventory risks
- Assist business intelligence reporting

AI-generated outputs are intended solely as decision-support tools and must not replace professional medical judgment.

5. OCR and Document Processing

Uploaded documents may be processed using OCR technologies including:

- LandingAI OCR
- Tesseract OCR

These technologies are used to extract and structure medical information from uploaded files.

6. Data Storage

Information is stored using:

MongoDB Atlas

- Patient records
- User accounts
- Prescriptions
- Appointments
- Billing information
- Audit logs
- Medical documents

Local Server Storage

- Uploaded files
 - Temporary document processing data
 - Application assets
-

7. Access Control

Access to information is restricted based on user roles.

Administrators

- Full system access

Healthcare Staff

- Access necessary for treatment and operational purposes

Patients

- Access only to their own records and information

Authentication is enforced through secure login mechanisms and role-based access controls.

8. Data Retention

Temporary Verification Records

Pending scanned document verification records are automatically removed after 24 hours.

Authentication Sessions

Session records are automatically deleted after expiration.

Clinical Records

Patient records, prescriptions, billing information, and medical documents are retained until legally required retention periods expire or administrative deletion procedures are completed.

9. Data Security

We implement administrative, technical, and physical safeguards including:

- HTTPS/TLS encryption
- Secure authentication
- Password hashing
- Role-Based Access Control (RBAC)
- Audit logging
- Database access controls
- Backup and recovery procedures

Despite these measures, no system can guarantee absolute security.

10. Third-Party Services

The HMS platform utilizes third-party providers including:

- MongoDB Atlas
- Microsoft Azure OpenAI
- Google Gemini
- LandingAI

These providers may process information solely for the purposes authorized by MoviCloud Labs.

11. User Rights

Subject to applicable law, users may:

- Access their personal information
- Request corrections
- Request record updates
- Obtain copies of their information
- Request deletion where legally permissible

Deletion requests may require administrative review and approval.

12. Cookies and Analytics

The HMS platform does not use cookies for authentication.

Authentication is managed using secure token-based mechanisms.

The platform currently does not utilize third-party analytics or advertising trackers.

13. Children's Privacy

The platform is not intended for independent use by children without appropriate parental, guardian, or healthcare provider involvement.

14. Compliance

MoviCloud Labs strives to comply with applicable privacy and healthcare regulations including:

- Digital Personal Data Protection Act (India)
 - General Data Protection Regulation (GDPR), where applicable
 - Healthcare privacy requirements applicable to deployed jurisdictions
-

15. Changes to this Privacy Policy

We may update this Privacy Policy from time to time.

Updated versions will be posted within the HMS platform and become effective upon publication.
